

⚡ PRODUCTION UI/UX ARCHITECTURE & DESIGN SYSTEM

LEMO OTT

Mobile App UI Design

Official UI/UX design specifications, component guidelines, color engineering, information architecture, navigation graph, and interaction flows for the LEMO OTT Android & iOS mobile application.

APPLICATION VERSION	THEME ENGINE
v1.0.5 (Build 6)	Dual-Engine (Midnight Black & Pure Light)
FRAMEWORK & RUNTIME	TARGET FORMATS
React Native 0.76.7 / Expo SDK 54 / Hermes	Smartphones (ARM64, x86_64, Universal APK)

🌟 **Key Engineering Highlights Included in this Document**

Complete component breakdowns for Home Hero Slider, Vertical TikTok-style Shorts Engine, Dynamic HLS Video Player with Ad Integration, Adaptive Movie & Episodic Series Details UX, Tiered Subscription Billing, and O-Crash Strict Native Type casting.

SECTION 01

Design System & Color Engineering

Unified Midnight Black & Pure Light Palettes

Midnight Black Design Palette (Default)

Engineered for OLED battery efficiency and cinematic immersion with 0% blue/slate wash.

Canvas & Header Base

#000000

Card Surface Layer

#08080a

Track & Inner Containers

#111114

Electric Lime Accent

#b3d332

Subtle Razor Border

#1c1c22

High-Contrast Text

#ffffff

Pure Light Design Palette

Sleek, high-legibility daytime theme with soft slate depth and refined shadows.

Canvas Background

#f4f6fa

Elevated Card Surface

#ffffff

Inner Pill Container

#f0f3f8

Forest Lime Accent

#84a600

Border & Divider

#e2e8f0

Slate Primary Text

#0f172a

Typography & Layout Tokens

TOKEN NAME	SIZE / WEIGHT	LINE HEIGHT	USAGE ACROSS MOBILE APP
Header 1 (Hero Title)	20px / ExtraBold 900	26px	Screen headers, Hero carousel titles, Modal main titles
Section Header	15px / Bold 800	20px	Dynamic row headers (New Releases, Shorts, Short Films, Plans)
Card Body / Input	13px - 14px / Regular 400 & 600	18px	Search input, Descriptions, Form text fields, List rows
Metadata & Badges	10px - 11px / Bold 700	14px	IMDb rating circle, Quality badge (HD/4K), Tab labels, Status tags

Border Radii

- Outer Cards: 16px border radius
- Interactive Pills: 24px full-round pill
- Inputs & Controls: 12px ergonomic curve
- Badges & Tags: 4px-6px compact tag

Touch Interaction

- Active Opacity: 0.82 to 0.85 touch feedback
- Minimum Hit Box: 44px x 44px WCAG touch target
- Haptic Response: Seamless native click responses
- Transitions: 250ms ease-out animations

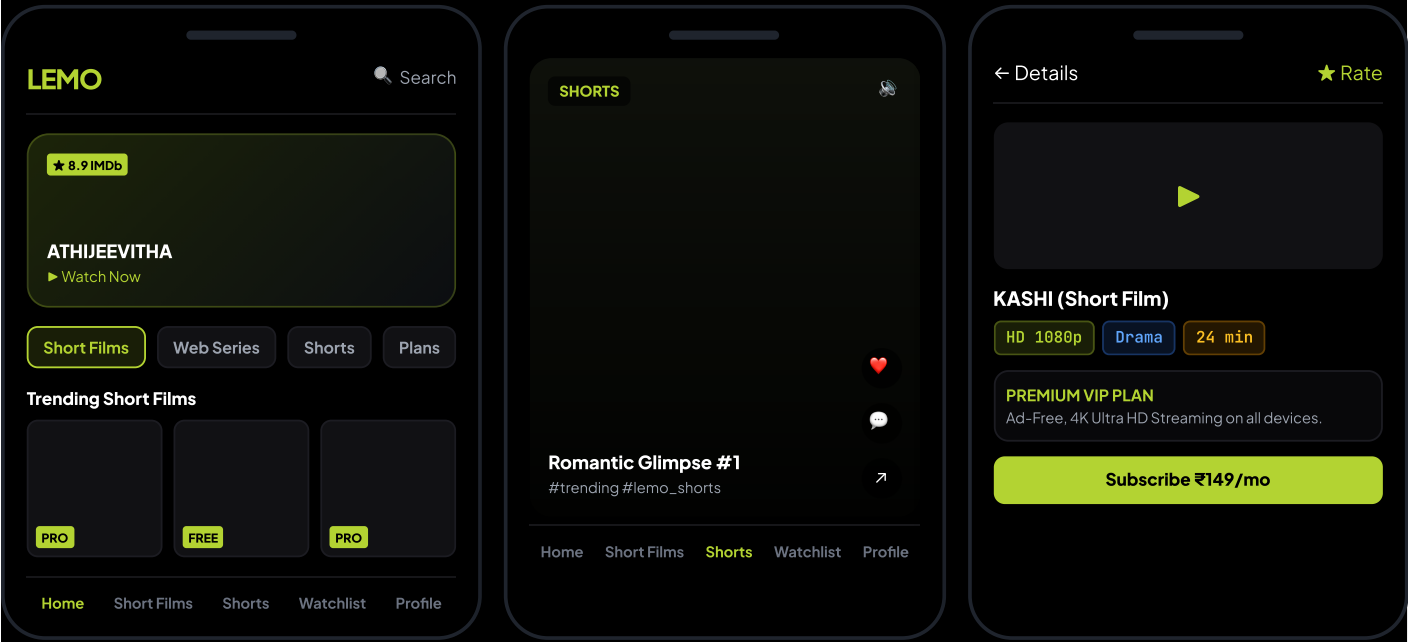

Accessibility Rules

- Strict Boolean: All disabled= {Boolean(...)}}
- Contrast Ratio: ≥ 7:1 for all critical text
- Safe Areas: Edge-to-edge with safe-area insets
- Offline Safety: Zero-state fallback graphics

SECTION 02

Navigation Graph & Screen Blueprints

Tab Routing Architecture & Screen Topology

Complete Tab Navigation Architecture

TAB KEY	SCREEN COMPONENT	LABEL & ICON	ADMIN TOGGLE DEPENDENCY	SCREEN PURPOSE
HomeTab	HomeScreen.js	Home (Lucide Home)	Always Active	Dynamic Hero Banner, Home Sections, Quick Category Row, Shorts Preview
MoviesTab	MoviesScreen.js	ShortFilm / Movies(Film)	menuSettings.shortFilms !== 'OFF' movies !== 'OFF'	Filtered grid with Genre, Language chips, and Paid/Free badge labels
ShowsTab	ShowsScreen.js	Shows / Pocket Reel(Tv)	menuSettings.shows !== 'OFF' webSeries !== 'OFF'	Web Series, Pocket Reel drama lists with season/episode counts
ShortsTab	ShortsScreen.js	Shorts (Clapperboard)	menuSettings.shorts !== 'OFF'	TikTok-style vertical video feed with like, view counters, and auth gates
WatchlistTab	WatchlistScreen.js	Watchlist (Bookmark)	Always Active (Auth Gated)	Saved movies, shows, and shorts synced seamlessly with backend database
ProfileTab	ProfileScreen.js	Profile (User)	Always Active	User details, Plan Status, Segmented Theme Switcher, Creator Hub, Info

SECTION 03

Component Engineering & Screen Deep Dive

Technical implementation of core application screens

 Custom HLS Video Player (**PlayerScreen.js**)

High-performance video streaming with expo-av and HLS master manifest playback.

- **Adaptive Streaming:** Auto quality selection from 360p up to 4K Ultra HD.
- **Gesture Controls:** Double tap left/right for ±10s seek with ripple animation.
- **Smart Ad Injection:** Pre-roll and mid-roll advertisement engine with non-skippable countdown timer.
- **Binge-Watch Mode:** 10-second auto next episode countdown with direct cancel/play action.
- **Rating Submission:** Native 5-star interactive rating modal with backend sync.

 Vertical Shorts Engine (**ShortsScreen.js**)

Full-screen vertical paging feed with auto memory management.

- **Viewability Auto-Play:** Only the active centered short renders video; adjacent items unmount to conserve GPU memory.
- **Engagement Actions:** Double-tap heart burst with optimistic like count increments.
- **Auth Gate Protection:** Unauthenticated users prompted with custom sign-in modal on like/save.
- **Direct Details Bridge:** 'Watch Full Movie/Series' deep-link direct to DetailsScreen.

 Adaptive **DetailsScreen.js**)
Details (

Dynamic UI adapting between Short Films, Movies, and Shows.

- **Zero Redundancy:** Episode accordions hidden for single-play films.
- **Watchlist Engine:** Instant bookmark state with optimistic UI caching.
- **Premium Gate:** Paid content routes users to Subscription Checkout.

 Pocket Reels **PocketReelsScreen.js**)
Grid (

2-column micro-drama discovery grid with episode counters.

- **Hero Spotlight:** Featured trending drama banner with Instant Ep 1 Play CTA.
- **Episode Counters:** Total episodes pill and Free/VIP tier badges.
- **Drama Genre Filters:** Romance, Revenge, Suspense, Comedy pill bar.

 Monetization **SubscriptionScreen.js**)
& Billing (

Tiered plan cards with multi-gateway checkout.

- **Active Plan Detection:** Badges active plan & disables duplicate buy.
- **Coupon Engine:** Instant verification with discount math in Checkout.
- **Security:** 256-bit SSL encrypted badges to maximize checkout trust.

 Robustness, Fault Tolerance & 0-Crash Native Architecture

Type-Safe Accessibility Props

All disabled props wrapped in `Boolean(...)`. Prevents native RCTView Android casting crashes from falsy empty strings.

Full-Screen Offline Modal

Dedicated `OfflineView` modal isolated from headers and tab bars with automatic network reconnection listener and animated retry.

Dynamic Header Sanitization

Content sanitizers automatically strip duplicated headings in Static Pages and deduplicate repeated sections across the home feed.

SECTION 04

Theme Matrix & Critical User Journey Flows

Visual State Progression & End-to-End User Journeys

Theme Token Contrast & Parity Matrix

UI ELEMENT / TOKEN	MIDNIGHT BLACK THEME (#000000)	PURE LIGHT THEME (#F4F6FA)	VISUAL PURPOSE
Main Screen Background	#000000 (Pitch Black)	#f4f6fa (Light Canvas)	Primary root container background
Card / Section Container	#08080a (Midnight Surface)	#ffffff (Pure White)	Card elevation and structural grouping
Secondary Tracks / Pills	#111114 (Neutral Dark)	#f0f3f8 (Soft Slate)	Inner track, segment control backgrounds
Borders & Dividers	rgba(255,255,255,0.08) / #1c1c22	#e2e8f0	Crisp structural edge definition
Primary Brand CTA	#b3d332 (Electric Lime / Text #000)	#84a600 (Forest Lime / Text #FFF)	High-conversion action buttons
Bottom Tab Bar	#000000 (Pitch Black)	#ffffff (Pure White)	Root app persistent navigation dock
Status Bar Mode	light-content (White Icons)	dark-content (Dark Icons)	OS status bar icon legibility

Content Discovery & Playback Flow

- Step 1: User browses Dynamic Home Sections or filters Short Films by Genre & Language.
- Step 2: Clicks Media Card → Navigates to DetailsScreen with backdrop trailer preview.
- Step 3: Clicks "Watch Now" CTA → If Free: opens PlayerScreen with pre-roll ad.
- Step 4: If Premium content: checks active subscription → redirect to SubscriptionScreen if unverified.

Subscription & Upgrade Flow

- Step 1: User selects plan (Basic / Standard / VIP Premium) in SubscriptionScreen.
- Step 2: Moves to CheckoutScreen → optional Promo Code application with real-time math.
- Step 3: Initiates Secure Gateway → payment verification webhook updates MongoDB user record.
- Step 4: Instant upgrade receipt → full ad-free 4K streaming unlocked immediately.

LEMO OTT Mobile APK v1.0.5 is Ready for Deployment

All UI screens, components, color tokens, and navigation safety protocols are production-certified.

PRODUCTION READY
